Re: Letter of Reference

Dear Mr. Ward,

We are pleased to recommend Roger Ward Engineering to potential developers, builders, contractors, etc., for their civil engineering needs. We have worked with Roger Ward Engineering on several projects and found them to be professional, timely and paid particular attention to customer needs and expectations. They also understood the local design codes and worked very well with the various governmental jurisdictions.

Roger Ward Engineering is also in tune with residential real estate development practices, which is a definite advantage to understanding our projects beyond its engineering challenges. By helping us evaluate and determine our complete project needs, we consider Roger Ward Engineering a working partner that contributes to the delivery of a successful project.

Sincerely,

Beazer Homes Indiana LLP
